Companies

Given two strings `s` and `t`, return `true` if they are equal when both are typed into empty text editors. '#' means a backspace character.

Note that after backspacing an empty text, the text will continue empty.

Example 1:

Input: `s = "ab#c"`, `t = "ad#c"`
Output: `true`
Explanation: Both `s` and `t` become `"ac"`.

Example 2:

Input: `s = "ab##"`, `t = "c#d#"`
Output: `true`
Explanation: Both `s` and `t` become `""`.

Example 3:

Input: `s = "a#c"`, `t = "b"`
Output: `false`
